

# Booth Space Planning

The illustration below shows how all the different types of booths can work together in your dining area. This example uses 30" wide tops, a common size for most applications. The table top overhangs the front of the booth seat by 2". The depth of our double booths is 48" except for the Venus Booth which is 45". If you were to use a top with a different width, you would need to adjust the numbers below accordingly.
