

Globe Power Units for Tables

Green Globe Units

(Shown with Millennium Square Legs, wire management upgrades, all priced separately)

Black & White Globe Units

(Shown with Horizon & Metro Bases, Powerbox upgrades and wire management channels, all priced separately)

Who can even remember a time we weren't tethered to our devices? These stylish tabletop globe units keep everything juiced and ready to connect.

Set well above the table surface, away from food and liquids. Units include two 120 volt electrical outlets and a pair of USB chargers. Easy to assemble on site.

Power Unit placement depends on the kind of support being used as well as the size and shape of the top. Connect with your FurnitureLab account manager for recommended globe placement.

We recommend our **Horizon** and **Metro** Series bases as the columns can accommodate the power cord internally, and can be modified to accommodate a Globe Power Unit centered directly above the base, with the addition of a **Powerbox Base Upgrade** (shown above, top right image) and a wire management channel in the column. For round and square tables paired with other pedestal base models, please note that the power unit will not be centered on the top, and the cord will run external to the base column.

If used with our **Millennium** Series table legs, the units can be placed anywhere on the top, with again, a wire management channel in one or more legs as needed. These power units also work well with our **Cantilever** bases when adding power to a booth table.

Price: \$438 (Includes globe and cut out in table top; bases and optional Powerbox upgrades are additional)
