PreFixx® Protective Finish Chemical & Disinfectant Resistance

Subject:

Guidance for Disinfection

Summary:

OMNOVA Solutions manufactures a variety of performance fabrics sold under brands such as **Boltaflex**®, **BoltaSoft**®, **Nautolex**® and **PreVaill**®. Many of the performance fabrics feature a **PreFixx**® protective finish, which resists damage from disinfectants.

Cleaning After Disinfection:

The following cleaners should be used with a soft cloth or damp sponge to remove chemical residue.

- Formula 409® All-Purpose spray cleaner
- Hand dishwashing soap and water

After cleaning, rinse area with clean water, then dry with a clean, lint-free cloth. Failure to remove chemical residue will cause discoloration of the coated fabric surface to manifest earlier in the life cycle of the product.

Disinfectant Use:

In laboratory testing, upholstery protected with **PreFixx** finish was treated with the following disinfectants with little to no discoloration or damage to the upholstery. This testing may not reflect actual results in the field.*

Please see reverse side for full list of recommended disinfectants.
